

## Keith Bumgarner

Keith has more than 30 years of engineering, product development, and marketing experience in technology, all heavily influencing the development vision of FileGenius. A hallmark of his career has been to successfully match the needs of people with cost-effective, productive, and creative technology solutions. Throughout his career, Keith has repeatedly delivered solutions to organizations that pay for themselves many times over, always enhancing the bottom line and work experience for his clients. In his career he has worked with Xerox, Fuji, Sharp, 3M, Siemens, Harris, Kodak, AT&T, and other notable organizations to provide intelligent, productive, and creative ways to generate success through well-crafted technology. His belief that his own success can only be measured by the success of his clients is evident in every aspect of FileGenius, including customer service and support.

## Scott Wertime

Scott Wertime, with nearly 20 years experience in graphic communications and digital media, brings unique and practical influences to FileGenius that are front and center in every aspect of the product. Scott has honed these considerable skills over the years, developing successful and effective communications and electronic media tools for Qwest Communications, the Centers for Disease Control and Prevention (CDC), Mead Paper, Coca-Cola, and Cox Communications. His hands-on success at finding the perfect communication vehicle for his clients' needs has prepared him to deliver his best work yet, FileGenius. Working every detail to communicate the inherent and overriding productive personality of FileGenius, Scott's contribution has become vital to our shared goal of propelling FileGenius to the forefront of web-based file transfer solutions.

## Steve Bumgarner

Steve, armed with a Computer Science degree from a prominent northeastern university, has embraced the real-world challenges of developing efficient and successful web-based, front-end marketing tools for international leaders in the fields of technology, healthcare, financial services, media & entertainment, and telecommunications. Motivated by a strict "best practices" regimen, Steve applies an increasingly expansive skill-set to all projects. This includes the significant achievement of leading the front-end to back-end integration of the marketing and site conversion of Ameritrade.com to TD Ameritrade.com, following the 2006 merger of the two financial giants. Now devoting his considerable resources to FileGenius, the evidence is there for all to experience. Approaching his second decade in technology, Steve's rich experiences gained while successfully developing the web presence of highly visible, demanding organizations plays an indispensable role in the ongoing evolution of FileGenius.
