Security Features

Transfers protected with 256-bit encryption. Personnel access to data center restricted. No passwords stored, all are SHA encrypted. Browser cookies not used for passwords, marketing, or tracking info. Concealed, hidden site addresses. Full daily backups of all customer files.

File Compatibility and Size Limit

100% compatibility with all file types.

Maximum file size of 2GB.

File Permissions

Set per user, using granular permission scheme. Permission settings available for: Upload Files; Download Files; Move/Copy Files; Rename Files; Delete Files; Create Folders; All Workspace Access; Administrator

Users and Workspaces

There are no limits to the numbers of users or private, secure workspaces that can be created.

Non-user File Upload and Download

Non-users can upload files through the DropBox option (enabled or disabled by the administrator). Files can be downloaded by using the Send File system to email file links to non-users.

Multiple File Upload

Three simultaneous uploads are currently supported.

Search

Files may be searched by: user, workspace, job numbers, name, date and time, size, and file extension, as well as user-defined file ID and comments.
